“The best experience in the summer job was that we managed to remove so much rubbish from the beaches. The local population was very supportive. That were days filled with solidarity, **a real transition for our local environment**, which makes it the highlight of summer.”

Theodor, 15 years.

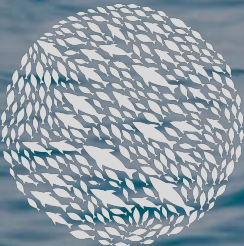

“It is important for teenagers to see how bad our beaches are and that we as **the next generation can make it better and stop pollution.**”

Elida, 15 years.
